

# Park Pet Hospital Estimate and Informed Consent Form

This estimate of charges is intended to approximate the expenses anticipated in the veterinary care of your pet as listed on the reverse side. If additional tests, treatments, or procedures are indicated that will cause the bill to exceed this estimate by more than 25%, we will attempt to contact you by phone. If we are unable to contact you or in case of emergency, the veterinarians are authorized to proceed as they deem necessary. Payment is expected when the services are rendered unless other arrangements are made in advance.

Preanesthetic blood tests are recommended to help recognize health problems that are not apparent during routine physical examination. While preanesthetic blood testing can not assure an outcome, the testing may help improve the safety of your pet during anesthesia. Level I preanesthetic testing screens for kidney, liver, diabetes, and anemia-related conditions. Level II preanesthetic testing includes all of the Level I tests plus screening tests for some blood clotting conditions. The cost of the estimate will be increased by **\$47** if Level I testing is performed or **\$79** if Level II testing is performed.

**I authorize preanesthetic testing Level 1 \_\_\_\_\_ Level 2 \_\_\_\_\_**

**I decline all preanesthetic blood testing \_\_\_\_\_**

## Consent

I hereby authorize the **Park Pet Hospital** to provide the veterinary medical, surgical, or dental care listed in this estimate of charges. I understand the nature of the procedures listed and have had the opportunity to read information or to ask questions pertaining to possible side effects, risks and complications of these procedures. I am aware that medicine, surgery and anesthesia are not exact sciences, and that variable outcomes may occur. No guarantees have been made or implied concerning the results of these procedures. In case of emergency, I hereby authorize the veterinarians of the **Park Pet Hospital** to provide additional care if it is deemed necessary in their professional judgment. I am aware that the Park Pet Hospital does not provide 24-hour care for hospitalized pets and that they will be left alone overnight. If their medical condition is unstable and critical care monitoring is necessary or if the doctor feels it is in the best interest of the patient he/she will recommend transfer to a 24-hour care facility. I have been given the opportunity to discuss this matter with staff members.

Trained personnel will closely monitor all patients using up to date equipment, however, in the case of an emergency, the pet's owner will be notified as soon as possible at the phone numbers listed below and the Park Pet Hospital will provide cardiopulmonary resuscitation (CPR). All clients leaving pets at the hospital will be required to provide advance directives for the level of CPR that will be instituted in the unlikely event of cardiopulmonary arrest. Level 1 authorizes no efforts for CPR. Level 2 authorizes reasonable, non-invasive attempts at resuscitation that the veterinarian feels are appropriate such as oxygen therapy, intravenous fluids, drug treatments and external cardiac compressions. Extra fees for CPR efforts will be charged regardless of the outcome. I therefore select the following level of care in case CPR is necessary:

**Level 1 \_\_\_\_\_ Level 2 \_\_\_\_\_**

**Owner of pet or their agent \_\_\_\_\_**

**Date \_\_\_\_\_**

**Phone number(s) \_\_\_\_\_**
